EDUCATION

2017-2020 | Information Systems
Uni-Facef

EXPERIENCE

Software Enginner III, CloudWlk, Inc
December 2022 - Present

Languages: (Golang).

Databases: (Redis, PostgreSQL).

Containers: (Docker, Kubernetes).

Cloud Computing: (GCP).

- Development of blockchain client using go-Ethereum.
- Development of an efficient statement feature, listening events from the blockchain with a publisher and subscriber Kafka.
- Development of jobs using Faktory to process data of the transaction of clients.
- Development of hard logic blockchain integration as a subscriber listening events from contracts.

Systems Development Analyst, Cedro Technologies

February 2022 - December 2022

Languages: (Golang, Python, C#).

Databases: (Redis, PostgreSQL, MongoDB).

Containers: (Docker, Kubernetes).

Cloud Computing: (GCP).

- Development of Firebase authentication (SSO).
- Development of generic projects using Python as the main language.
- Improvement git flow with better tips.
- Google Cloud Platform for capturing logs.
- Development of several features for the chatbot department.
- Development of application pub/sub utilizing RabbitMQ.
- Development of API's Golang using gRPC.
- Refactor several scripts with Golang, fixing their flows.
- Development CI/CD utilizing bitbucket pipelines.

Software Development Engineer, Quero 2 Pay

February 2021 - February 2022

Languages: (Golang).

Databases: (Redis, MySql, SQLServer).

Container: (Docker).

Cloud Computing: (AWS).

- Development of innovative ideas and MVP to test market acceptance of possible new products.
- Improvement of CI/CD maintenance with standard reusable workflows using env vars for specific configurations using GitLab CI/CD and Amazon S3 with Amazon CodePipeline and other resources.
- Development of several features of the financial department.
- Improvement test coverage using better test abstractions with Golang.
- Development of conciliation, register of receivables, and liquidation flow utilizing Golang consuming AWS SQS and API.
- Development of DevOps, creating AWS SQS, AWS EC2, AWS Lambda, AWS ECR, AWS IAM, CodePipeline, AWS S3, Route 53, and many services inside AWS.

Full-Stack Developer, Codebit

February 2019 - February 2021

Languages: (NodeJs, React Native, React).

Databases: (Realm, MySql, MongoDB).

- Development of mobile projects as responsible for monitoring and mentoring interns and new co-workers in mobile development.

- Development of two mobile applications on-demand for our customers.
- Development of mobile project structures, such as initial templates for new projects.
- Improvement processes such as version generation using CodePush, and Jenkins, creating APIs in NodeJs for automated publication in CRM when application version is generated.
- Guarantee of standard commits using Git Hooks (Husky) and Git-CZ, code standardization using ESLint.
- Development of a platform and CRM using NodeJS, Handlebars, and Sequelize.

Mobile Developer, MazzaFC Tecnologia da Informação **March 2018 - January 2019**

Languages: (NodeJs, React Native, React).

Databases: (Realm, MySql).

- Development of two mobile applications with online and offline options to use the application using Realm database and other good libs of React Native.
- Development of a CMS on-demand for our customers using React and NodeJs.
- Guarantee of commits using Git Hooks, Git-CZ, and code standardization using ESLint.
- Lecture about ES6, ES7, ES8, and ES9, their functions and resources, and how they can be used for good practices when working with JavaScript.
- Improvement of automated versions using CodePush.

Full-stack Developer, Irroba E-commerce **October 2017 - February 2018**

Languages: (PHP, jQuery, JavaScript).

Database: (MySql).

- Development of layouts on-demand, requiring using CSS and its selectors in jQuery and HTML.
- Development of configurations for the e-commerce platform (PHP).
- It was my first experience with PHP, and I adapted well to the good explanations of co-workers. Still, I was not interested in going deeper in my studies because I discovered mobile development.

Front-End Developer, SMN Tecnologia da Informação **April 2017 - October 2017**

Language: (Angular Js).

- Development of a CMS on-demand for our customers.
- Improvement git-flow for our use cases.
- It was my first contact with programming languages and development.

- I had two months in which I only produced programming logic with JavaScript, creating games like Snake, Tic Tac Toe, and slideshow.
- After two months of studying the logic of programming, Angular, and JavaScript, I started working on projects that already existed in the company.
